## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 14-24, drawn to shoe and sandal with a rotatable tongue attached to the vamp, classified in class 36, subclass 11.5.
  - II. Claims 25-30, drawn to shoe with sole, upper and collar, the collar being rotatably attached to the upper, classified in class 36, subclass 114. .
  - III. Claims 31-36, drawn to a boot with a vamp and segmented tongue, the lower portion of the segmented tongue having a rotatable portion attaching the two segments, classified in class 36, subclass 54.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions have different designs effects and modes of operation. Invention I encompasses only a tongue attached to a vamp for rotation of the entire tongue with respect to the vamp. Invention II encompasses a collar rotationally attached to an upper and does not require the tongue of inventions I or III. Invention III encompasses a boot (not required by either of Inventions I or II) with a segmented tongue with rotating means located between the portions of the tongue to allow the upper portion of the tongue to rotate with respect to the lower portion of the tongue.
3. Because these inventions are independent or distinct for the reasons given above, the inventions require a different field of search (see MPEP § 808.02), have acquired a separate status in the art because

Art Unit: 3728

of their recognized divergent subject matter, and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Paul Denk on March 9, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Stashick whose telephone number is 571-272-4561. The examiner can normally be reached on Monday through Thursday from 8:30 am until 4:00 pm.
